Finance Systems & Applied AI Leader — finance transformation and enterprise-applications background (Encore Capital, Workday Adaptive) and an electrical engineering foundation (Nokia, NYU MBA) — architects, builds, and operates the AI-agent systems that run AP, CFO reporting, and lease/maintenance operations for multi-location operators.

EDUCATION

New York University, Leonard N. Stern School of Business • *New York, NY*

MBA, Financial Instruments and Markets • May 2010

University of California, San Diego • *San Diego, CA*

B.S. Electrical Engineering, Minor in Economics • December 2003

SKILLS

Workday Adaptive • Oracle NetSuite (RESTlet/API) • Enterprise Applications (ERP) • CFDI 4.0 / SAT Invoice Validation • AI Agent Systems (Claude/Anthropic, Vapi Voice AI) • FP&A and Board Reporting • SQL • Next.js/Postgres

Certifications: Claude Certified Architect – Foundations (Anthropic, in progress)

EXPERIENCE

Technology Consultants Inc • *San Diego, CA*

Founder & Director, AI/Systems Integration • 2023 – Present

- Architected and shipped a 12-skill agentic operating system now running in production for 2 paying clients across restaurant and real estate verticals, automating AP, lease screening, maintenance dispatch, CAM allocation, and CFO reporting — every action touching money or a third party gated behind human approval.
- Built an AP Control Tower (procure-to-pay automation) for a restaurant client: CFDI 4.0 validation + 3-way match against Oracle NetSuite, cutting invoice processing cost ~88% (\$10 → \$1.20/invoice) and turnaround from 24 hours to 3 minutes.
- Deployed 3 named AI agents (Diego, Mariana, Renata) for a commercial real estate plaza client, replacing manual maintenance-ticket triage/cost attribution, lease exclusive-use conflict screening, and CAM shared-expense proration/reconciliation — all three in active use on the client's live portfolio.
- Founded ApptHelper / OpenCita, Global Entry and SENTRI appointment-monitoring SaaS (English/Spanish); spearheaded Dynamics GP-Workday Adaptive integration (45% data-accuracy gain) and automated FP&A reporting (60% faster, 20+ hrs/week saved).
- Completed Colorwave's AI TRAC 2024 fellowship (top ~10%); built Encounter AI, an investor-backed voice AI drive-thru/kiosk platform.

Encore Capital • *San Diego, CA*

Senior Financial and Systems Analyst • 2017 – 2023

- Led implementation of RevInsight, Encore Capital's Revenue Recognition system for distressed financial products, running agile sessions with the Bangalore team as sole owner of the system through go-live.
- Led CECL implementation in Workday Adaptive across Latin America, Europe, and U.S. business units — consolidating disparate financial products into one system — on time and on budget, cutting 10-Q SEC report generation time 67%.
- Served as CECL SME in Workday Adaptive, cutting data input 25% via collaboration with the Data Science team and authoring the data-migration BRD.
- Streamlined reporting as Workday admin, building 50 new reports (HTML/OfficeConnect/Workday) that replaced hundreds of manual Excel reports for Accounting and FP&A.

Blackmere Capital • *San Diego, CA / Mexico City, MX*

Institutional Relationship Manager • 2014 – 2017

- Managed institutional relationships for Petróleos Mexicanos (PEMEX) Union in Mexico City through Mexico's energy/financial reforms, achieving 20% client retention via new business development and monthly opportunity reporting.

Together and Company • *San Diego, CA*

Business Development and Co-Founder • 2012 – 2014

- Raised a full year of operational funding from angel investors, exceeding the target 4 months ahead of schedule.

Bank of America Private Bank • *Boston, MA*

Private Client Manager • 2010 – 2012

- Managed investment portfolios for 65+ clients with a \$5MM+ minimum.
- Launched a bank-wide predictive model (Bloomberg, Wealth Monitor, Wealth X) targeting pre-M&A executives, generating \$80MM in new assets and \$100MM in new business opportunities.

Nokia Inc. • *San Diego, CA*

Software Test Engineer • 2003 – 2008

- Developed DSP chipset algorithms for Nokia's wireless engineering team (GSM/CDMA, AT&T/Verizon carriers); persuaded a client to change specifications, improving software quality 33% and battery life 45%.

Qualcomm Inc. • *San Diego, CA*

Software Test Engineering Intern • 2000 – 2003

- Tested mobile phone modem performance and maintained the team database tracking software-error progress; advised teams in Bangalore on software changes that increased mobile phone battery life 50% through algorithm and error-detection refinements.
